# INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/GB 03/02596

I. Bas	is	of	the	rep	ort
--------	----	----	-----	-----	-----

1.	With regard to the elements of the international application (Replacement sheets which have been furnished to
	the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed"
	and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)):

	De	scription, Pages						
	1-2	24	as originally filed					
	Cla	aims, Numbers	•					
	1-2	20	as originally filed					
S	eque	ence listing part of t	he description, pages:					
3-	-10,	15-17, as originally fi	led					
2.	Wil lan	With regard to the <b>language</b> , all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.						
	The	These elements were available or furnished to this Authority in the following language: , which is:						
		the language of a translation furnished for the purposes of the international search (under Rule 23.1(b)).						
		the language of pub	olication of the international application (under Rule 48.3(b)).					
		the language of a translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).						
3.	Wit inte	Vith regard to any <b>nucleotide and/or amino acid sequence</b> disclosed in the international application, the nternational preliminary examination was carried out on the basis of the sequence listing:						
		contained in the inte	ernational application in written form.					
		filed together with the international application in computer readable form.						
		furnished subseque	ntly to this Authority in written form.					
	$\boxtimes$	furnished subseque	ntly to this Authority in computer readable form.					
	⊠	The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.						
	Ø	The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.						
4.	The	amendments have r	esulted in the cancellation of:					
		the description,	pages:					
		the claims,	Nos.:					
		the drawings,	sheets:					
5.		This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)).						
		(Any replacement sh report.)	neet containing such amendments must be referred to under item 1 and annexed to th	nis				

## INTERNATIONAL PRELIMINARY EXAMINATION REPORT

#### Re Item V

Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

**Novelty (Article 33.2 PCT)** 

Having regard to document D1 cited in the International Search Report the subject- matter of claims 1-20 lacks novelty (Article 33.2 PCT). D1 describes already immunogenic conjugates (and corresponding nucleic acid molecules) comprising at least one vascular endothelial growth factor (VEGF) peptide moiety (e.g. of 25 amino acids - SEQ ID NO: 19) coupled to a carrier (e.g. a cytotoxic agent) which are useful for treating solid tumors (see Abstract). The polypeptides of SEQ ID NO's: 19, 25-27, 31. 86-89 contain at least a part of SEQ ID NO: 1 of the present application and are identical to the consensus sequence of claim 10. It follows that all claims of the present application lack novelty.

#### **Further comments**

For the assessment of the present claims 19-20 on the question whether they are industrially applicable, no unified criteria exist in the PCT Contracting States. The patentability can also be dependent upon the formulation of the claims. The EPO, for example, does not recognize as industrially applicable the subject-matter of claims to the use of a compound in medical treatment, but may allow, however, claims to a known compound for first use in medical treatment and the use of such a compound for the manufacture of a medicament for a new medical treatment.
